FE-NAL
RACKING & CONVEYOR SOLUTIONS

ABOUT FE-NAL

**Built on Experience.
Driven by Precision.**

FE-NAL is a Spanish-Slovenian industrial contractor specialising in the construction and installation of racking and conveyor systems across Europe.

Our team brings over 20 years of combined experience in industrial assembly — delivering every project with precision, safety, and full commitment from start to finish.

KEY FACTS

20+

Years of
industry
experience

2

European bases —
Spain & Slovenia

100%

Project
commitment

EU-WIDE

Operations

OUR MISSION

To build and install warehouse infrastructure that lasts — delivered safely, precisely, and on time.

FE-NAL
RACKING & CONVEYOR SOLUTIONS

OUR PROCESS BUILT ON PRECISION.

A clear process keeps every installation safe, on schedule, and built to spec. Here is how we deliver.

01

STEP 01 — SITE SURVEY

We assess your site and confirm specifications before mobilising.

02

STEP 02 — PROJECT PREPARATION

We coordinate materials, equipment, and site logistics.

03

STEP 03 — SAFETY SETUP

Site secured. Crews briefed.
Work begins under full safety control.

04

STEP 04 — INSTALLATION & ASSEMBLY

Skilled teams build your system with structural precision.

05

STEP 05 — QUALITY CHECK

Every component verified against drawings and load specifications.

06

STEP 06 — TESTING & COMMISSIONING

We confirm the system performs safely and reliably.

07

STEP 07 — HANDOVER & SUPPORT

A fully operational system, with support whenever you need us.

WHAT DEFINES OUR PROCESS

ACCURATE BUILD

Every detail installed to specification.

EXPERT EXECUTION

Skilled crews.
Delivered with precision.

QUALITY ASSURANCE

Built to the highest safety standards.

LONG-TERM PARTNERSHIP

Lasting relationships built on trust and results.

OUR COMMITMENT TO YOU

From kickoff to handover and beyond, we install systems that improve efficiency, support safety, and serve your business for years.

YOUR SUCCESS IS OUR STANDARD.

Let's build safer, stronger warehouses together.

RACKING & CONVEYOR SOLUTIONS

WHY COMPANIES CHOOSE FE-NAL

20+

20+ YEARS OF EXPERTISE

Two decades of racking and conveyor installation across European industries.

PRECISION-FIRST APPROACH

Every installation built to spec, checked against safety standards, and signed off only when it meets our benchmark.

PRECISE EXECUTION

Skilled crews deliver flawless installation — on time, every time.

EUROPEAN REACH

Bases in Spain and Slovenia. Projects across Europe.

OUR VALUES

QUALITY WITHOUT COMPROMISE

We build to the highest standards because we take pride in our work.

PRECISION IN EVERY DETAIL

From structural alignment to safety compliance, we treat every element with care.

RELIABILITY YOU CAN PLAN AROUND

Our clients depend on us to show up, execute, and deliver on schedule.

TRANSPARENT PARTNERSHIP

Clear communication, honest expectations, lasting relationships.

BUILT ON TRUST.
FOCUSED ON RESULTS.

FE-NAL

RACKING & CONVEYOR SOLUTIONS

RACKING SYSTEMS & INSTALLATION

**Designed for performance.
Built to last.**

A racking system is the backbone of any warehouse. Installed correctly, it maximises usable space, improves picking efficiency, and supports safer working conditions.

At FE-NAL, every racking installation is treated as a long-term infrastructure investment — built precisely, safely, and to last.

SYSTEMS WE INSTALL

PALLET RACKING

Versatile storage with direct access to every pallet — ideal for high-selectivity warehouses and a wide range of load capacities.

SHUTTLE SYSTEMS

High-density automated storage using robotic shuttles — maximum space utilisation with fast retrieval.

MEZZANINES

Elevated platforms that add floor space inside existing facilities — extra storage, office, or production area without building extensions.

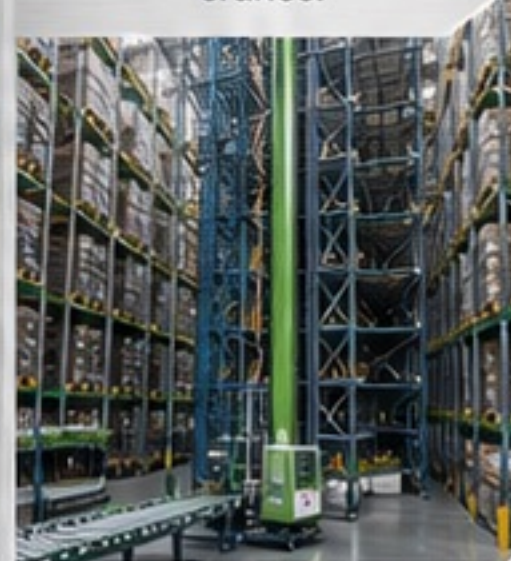

MINI-LOADS

Automated storage and retrieval for small parts and containers — high-speed picking with precise handling up to 50 kg per container.

HIGH-BAY WAREHOUSES

Tall racking structures over 12 metres — vertical storage maximised by automated stacker cranes.

KEY CAPABILITIES

Configurations to fit any warehouse layout

Structural precision and load-rated installation

Fast, efficient assembly with minimal disruption

Suitable for new builds and facility upgrades

**ENGINEERED SOLUTIONS.
BUILT TO PERFORM.**

FE-NAL
RACKING & CONVEYOR SOLUTIONS

CONVEYOR SYSTEMS

Keeping your operation moving.

A well-installed conveyor system reduces bottlenecks, increases throughput, and lowers operational costs.

FE-NAL's installation teams bring the mechanical expertise to assemble systems precisely, integrate them seamlessly, and have them ready to run from day one.

SYSTEMS WE INSTALL

CONVEYORS

Automated material handling that moves goods through your facility — frames, rollers, drives, belts, and supports, assembled to specification.

STACKER CRANES

Automated retrieval machines moving vertically and horizontally along aisles — fast, precise pallet handling for high-bay warehouses.

ROBOTIC INSTALLATION

Advanced robotic systems for palletising, sorting, and goods handling — integrated for maximum efficiency and consistent performance.

WHAT WE HANDLE

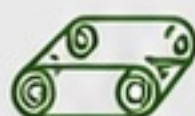

STEEL STRUCTURES

Frames, supports, and load-bearing components.

MOTORS & DRIVES

Power units installed and aligned.

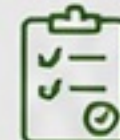

BELTS & ROLLERS

Conveyor sections built to specification.

SENSORS & CONTROLS

Integrated for safe, reliable operation.

TESTING & INTEGRATION

System checks, performance testing, and full integration.

BENEFITS YOU CAN EXPECT

SMOOTHER FLOW

Reduced bottlenecks and continuous material flow.

HIGHER THROUGHPUT

Optimised systems designed for maximum performance.

LOWER OPERATING COSTS

Efficient systems that reduce downtime and labour demand.

BUILT FOR RELIABILITY

Durable installations that perform every day.

PRECISION INSTALLATION.
MAXIMUM PERFORMANCE.

FE-NAL

RACKING & CONVEYOR SOLUTIONS

RACKING INSPECTION

Prevent risks. Ensure safety. Stay compliant.

Regular racking inspections are essential to prevent accidents, protect your staff, and keep your warehouse running efficiently.

FE-NAL delivers professional inspections in line with EN 15635, providing clear reports and practical solutions to maintain your racking system at its best.

OUR INSPECTION SERVICES

VISUAL INSPECTIONS

Identify visible damage, misalignment, or wear that could compromise safety.

STRUCTURAL CHECKS

Evaluate the condition of beams, uprights, connections, and load-bearing components.

DETAILED REPORTING

Clear reports with findings, photos, risk levels, and recommended actions.

COMPLIANCE & STANDARDS

Inspections carried out in accordance with EN 15635 and applicable safety regulations.

REPAIR RECOMMENDATIONS

Practical solutions to restore safety and extend racking lifespan.

INSPECTION FREQUENCY (EN 15635)

DAILY

OPERATOR CHECKS

Visual checks by trained warehouse personnel to spot obvious damage.

MONTHLY

COMPETENT PERSON INSPECTIONS

Detailed inspections carried out by a competent person to ensure structural safety.

ANNUALLY

EXPERT INSPECTIONS

Comprehensive inspection by an expert, with full assessment and reporting.

OUR SAFETY COMMITMENT

A safe warehouse starts with a safe racking system. Early detection prevents damage, reduces downtime, and protects what matters most — your people and your business.

**INSPECT TODAY.
PROTECT TOMORROW.**

**SAFETY ISN'T AN OPTION.
IT'S OUR STANDARD.**

THE PEOPLE BEHIND THE PERFORMANCE

Behind every successful project is a skilled team that takes pride in doing things right.

At FE-NAL, our people bring expertise, dedication, and a commitment to safety and quality on every installation.

OUR TEAM. YOUR ADVANTAGE.

EXPERIENCED PROFESSIONALS

Skilled specialists with years of hands-on experience in racking and conveyor systems.

SAFETY & QUALITY FOCUSED

Safety is our priority. Quality is our standard. We never compromise on either.

COMMITTED TO DELIVERY

From planning to handover, we stay focused, solve challenges, and deliver results.

PARTNERS IN YOUR SUCCESS

We work as an extension of your team — reliable, transparent, and always on your side.

OUR LEADERSHIP TEAM

JERNEJ PEPERKO
Co-Founder & Director

Strategic leadership and operational oversight. Focused on precision, growth, and long-term partnerships.

BOJAN ŽNIDARIČ
Co-Founder & Director

Technical expertise and project execution. Ensures every installation meets the highest standards.

DEAN KOŠIR
Operations Manager

Leads day-to-day operations with focus on efficiency, coordination, and on-time delivery.

BORUT VRNIK
Project Manager

Oversees project planning and execution. Ensures smooth delivery from start to finish.

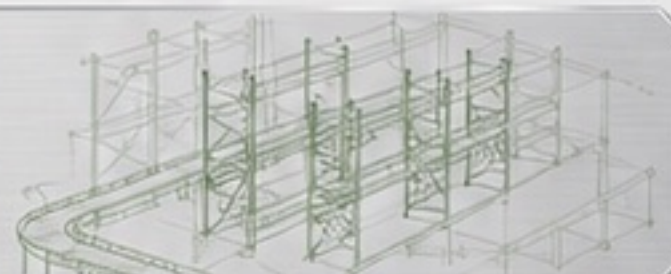

GORAZD KRANJC
Commercial Manager

Drives business development and client relationships across Europe.

“

Great systems are built by great people.
We invest in our team, because your success depends on it.
